CAPABILITY STATEMENT

Bimkorlings Consults™ is a cross-border consulting platform serving public agencies, health systems, nonprofits, primary care organizations, and community-serving institutions in the United States and Canada. As a registered trademark holder in both Canada and the United States, we deliver applied research, survey design, program evaluation, health informatics, workflow improvement, outcomes research, and implementation support for organizations seeking measurable, decision-ready results.

CORE CAPABILITIES

- Survey design, needs assessment, structured stakeholder interviews, outreach strategies, multilingual data collection approaches, and community-informed assessment methods.
- Program evaluation, performance monitoring, key performance indicators, logic models, dashboard logic, and practical reporting tools.
- Health informatics, workflow redesign, requirements analysis, interoperability readiness, data documentation, and digital process improvement.
- Outcomes research, mixed-methods analysis, observational studies, survey analytics, trend interpretation, benchmarking, and executive-ready synthesis.
- Implementation support, technical assistance, project coordination, change support, process standardization, work planning, and readiness support.

SELECTED EXPERIENCE

- Carleton Primary Health Clinic: bilingual patient check-in survey and barcode-enabled digital workflow across four clinic locations.
- New York Medical College Center for Human Rights: needs assessment surveys for asylum seekers and trafficking survivors, including data collection and leadership reporting.
- Hope Mission, Edmonton: behavioral health needs assessment and program evaluation for shelter clients using structured surveys, stakeholder input, trend analysis, and actionable reporting.
- Public-sector and municipal delivery: project coordination, implementation oversight, stakeholder management, analytics, and delivery within complex organizational settings.

REPRESENTATIVE DELIVERABLES

Survey instruments | Needs assessment reports | Evaluation frameworks | Dashboards | Literature reviews | Benchmarking reports | Workflow recommendations | Implementation plans | Executive briefings | Technical narratives

WHY CLIENTS ENGAGE US

- Cross-border U.S. and Canadian delivery perspective.
- Integrated capability across survey work, evaluation, analytics, informatics, and implementation.
- Decision-ready outputs for leadership, boards, funders, and partner stakeholders.
- Equity-aware and operationally grounded approach focused on useful findings and feasible recommendations.
- Experienced team with academic, public-sector, healthcare, business analysis, and consulting backgrounds.
